

The information listed below provides you with basic features of Compile Worksurfaces.

- Compile thermally fused Worksurfaces are 1" thick and are finished with 3 mm PVC edging on all sides.
- Worksurfaces are predrilled to enable proper alignment with worksurface supports.
- Standard laminate offerings are available in thermally-fused (T). See laminate listings for details.
- Laminate Worksurfaces will have matching woodgrain trim only.
- Depth of the Worksurface scoops are 1 1/8" when measured from the Panel the Worksurface is attached to.
- All Worksurfaces require support items. These are priced separately within this section.
- Grain Direction for Worksurfaces are as follows:

CHEP End Panels

CWCC Worksurfaces

CWS Worksurfaces

- Communication and electrical wires are routed through a cable scoop located at the back of the Worksurface. When specifying a Straight Worksurface (CWS) or a Curvilinear Worksurface (CWVL), note that the number of cable scoops depends upon the width of the Worksurface. All other Worksurface shapes have one scoop on Panel edges.

**One Scoop
CWS 24" – 48"**

**Two Scoops
CWS 54" – 84"**

This page provides a three dimensional view of a sample configuration highlighting each **Worksurface** component required when specifying this configuration.

WORKSURFACES

CWS - RECTANGULAR WORKSURFACES

- All tops are thermally fused 1" thick with pilot holes to enable proper alignment with worksurface supports. Wood screws must be used.
- Compile worksurfaces feature a 3mm edge.
- Support hardware must be ordered separately. See the listings in this section.
- Width and depth dimensions listed include a nominal measurement (3/8") to account for wire management between the worksurface and adjoining panel.
- All surfaces over 48" will have two scoops, all others have one.
- Worksurfaces greater than 48" wide require additional structural support.
