

STRUCTURES

EVOLVE | PRODUCT SHEET

Introducing Evolve Acoustic Grid, a great addition to the top of any combination of Evolve Structures to create semiprivate hubs or workshops. With a wide variety of configurations available, create your desired space with a nearly endless array of planning options.

FEATURES:

- Evolve Structures offers a wide variety of panel and segmentation options to create your desired space with a nearly endless array of planning options.
- Acoustic Grid is constructed of acoustical PET Felt with slats running 6" apart to allow for access to lighting, air flow and fire suppression from the ceiling.
- Panel heights can vary to accommodate a wide variety of ceiling heights, starting as low as 84"h with the ability to stack over 16 feet high.
- Single Evolve Acoustic Grid structures can range from 4' x 5' up to 10' x 12' and could have multiple structures added to larger rooms with additional support beams at the top of the panels.
- PET Felt is available in 9 finishes and has the option to two finishes on the outer skirt and inner structure of each Evolve Acoustic Grid.
